

Top Kitchen Renovations this Autumn

Autumn is traditionally the best time of year for renovation projects. Once the summer finishes and Christmas starts to loom large on the horizon, it makes for the perfect time for a makeover; a makeover that will potentially breathe new life into your home. So in light of this, what better place to start than with a new kitchen?

If you are considering a new kitchen renovation this autumn, look no further than Buster and Punch for products that push the boundaries of interior design. Our unique brand combines punchy fashion with unexpected materials to create a range of exceptional products that will completely transform your home.

Creating Something Special

If you are in the market for top quality products that will turn heads and get people talking, then Buster and Punch has exactly what you are looking for. With a range of spectacular accessories and hardware to transform your kitchen, we are proud to say that we are one of the most up and coming brands in terms of interior design.

The Finishing Touches

Most people will put a lot of effort into finding, for example, the perfect cabinets for their kitchen when renovating but will spend little time on the finishing touches.

Those in the know will spend a lot of time finding the perfect accessories to really transform their kitchen, and they will invest in things such as top-quality dimmers, light switches, and euro plates to ensure the perfect finish.

Being bold and stepping out of your comfort zone can make all the difference in the world when it comes to finishing off the interior design in the kitchen, also ensuring that you get years of pleasure from what many consider to be the heart of the home.

Hardware such as pull bars, door handles, knobs and hooks are also worth spending some time on. And know that our top-quality products have been created to stand the test of time and are the ideal choice for forward-thinking individuals who put quality and ingenuity at the forefront of design.

The Importance of Planning

Before getting started on your kitchen renovation project though, it pays to plan ahead. After all, renovating a kitchen can be rather expensive, so it is important that you consider what you want from the space. Will you be entertaining, for example? If so, this is something to think about when planning the overall design.

Consider the amount of cupboard space you need, and whether you want to go for a minimalistic look. If minimalistic is for you, then you may require more internal storage space that can be utilised for small kitchen appliances when not in use.

Lighting is another important feature, and one that requires particular attention and careful consideration. Choosing appropriate lighting will help to maximise the kitchen space and make it easier for you to work. At Buster and Punch, we offer plenty of choices when it comes to lighting. From pendants and table lights to wall lights and chandeliers, we are certain you will find what you are looking for.

Colour is Important

This autumn, neutral colours and tones will be the 'in thing' with greys and browns continuing to steal the show. The appeal of such colours is that they are warm and earthy and can be effortlessly combined with stylish wood and metal. In addition, such neutral tones can be easily co-ordinated with other more colourful accessories and kitchenware to create a more personal touch. To that end, you will find a range of stylish accessories and glassware here at Buster and Punch to help personalise your kitchen renovation.
